

Dust Containment Systems

HEAVY-DUTY INDUSTRIAL VACUUM

900DC

The Blastrac 900DC dust containment system is specially designed to connect to the 900VMB steel shot blaster. Ideal for applications such as oil storage tanks & pipelines; ship hulls, off shore platforms, and a wide selection of vertical steel surfaces. The 900DC incorporates a unique two piece design. Baghouse and blower are two separate components that allow for easier maneuvering around the job site, and loading and unloading enclosed trailers.

Blastrac dust collection and containment systems are designed to comply with stringent industry standards for environmental friendliness and safety. With its rotary airlock dust extraction system and large capacity dust bag, the 900DC allows for handling of debris without shutting down, maintaining a continuous working job site.

The 900DC is equipped with standard silencer for low sound level and automatic air pulse jet cleaning system. All components are inside the body to obtain no risk of damage during work and transportation.

FEATURES AND BENEFITS:

- Standard silencer for low sound level
- Automatic air pulse jet cleaning system
- Fan and compressor are able to be switched on/off separately
- Equipped with one easy to replace big bag system
- Large diameter casters for easy transport
- Side change out cartridge filters
- Onboard air hose/nozzle for cleaning
- Heavy duty construction provides long service life

SPECIFICATIONS:

Dimensions Filter Unit: L 88.07in x W 52.95in x H 75.07in
(1345mm x 2237mm x 1907 mm)

Weight Filter Unit: 1896lbs (860 kg)

Dimensions Blower Unit: L 50.26in x W 45.66in x H 59.44in
(1160mm x 1276mm x 1510 mm)

Weight Blower Unit: 1102.31lbs (500 kg)

Motor Power: 25hp (18 kW) / 400-460 V / 60Hz / 63A / 5 pole CE plug

Dust Extraction Motor: 1 powerful motor

Filter: 20 high quality cartridge filters

Cleaning: Automatic pulse cleaning system

Dust Bag Capacity: 1 x 87.44 Gallon (1 x 331 liters)

Dust Hose Inlet: 6in

The Trusted Choice of Professionals for Over 30 Years
