

Kut-Rite

CONQUER 25 LP

Conquer25 LP Propane Grinder

Kut-Rite has partnered with Onyx Environmental Solutions to produce the most versatile propane operated grinder/polisher available in the industry. The Onyx technology exceeds OSHA standards for indoor operation ensuring the safety of the operator and the workplace environment. The Onyx propane system reduces carbon monoxide emissions by up to 98% over conventional propane powered systems by continuously adjusting the fuel flow and emissions automatically.

The Conquer25 LP incorporates all of the Conquer series ergonomic designs that have become "fan favorites" for Conquer users. For instance; the Tilt Back Bowl that is incorporated into each and every Conquer series machine is also included in the Conquer25 LP! Thus, allowing the operator to safely and easily perform service and required tool (abrasive) changes.

Features & Benefits

90 Degree Tilt back Head for easy and fast tool changes.

Direct Drive Electric Clutch for precision engagement of torque to the grinding/polishing tools.

Push/Pull Throttle Control allows the operator to dial in the rpm to match the abrasive/substrate specific requirement.

Quick Disconnect Tooling is redefining how concrete diamond tools are mounted.

Conquer25 Planetary Grinder

Featuring 90 Degree Tilt!

Quick Disconnect (QD) Magnetic Tooling

Kut-Rite's new Quick Disconnect tool mounting design is redefining how diamond tools are mounted. The QD system incorporates two locating pins, for precise tool positioning and the use of powerful neodymium rare earth "super magnets" to hold the tools in place. The result of this combination produces a tool system that allows quick and precise placing of tools for smooth running, holding power that virtually eliminates tool kick out during operation and extremely fast removal/insertion time.

Models	HP	Power Source	Production Path	Weight	Tool Speed	Grinding Head Pressure
Conquer25 LP	603cc (16JP)	Propane Powered	25"	500lbs	200-1500 RPM	380lbs
