No matter how you *cut* it.

CONQUER 30

Conquer 30 Planetary Grinder

Introducing the all new, Innovative, Conquer 30!

The Conquer 30 VS features a "low profile edge" that can easily reach underneath shelving, cabinets, and other hard to reach places. This feature allows the large planetary machine to reach underneath shelving, cabinets etc... and allows for closer edging by reducing the height of the machine bowl at the edge.

Features & Benefits

Conquer 30 is a three(3) headed planetary movement machine best suited for medium to large jobs.

Designed for both wet and dry applications

Conquer 30 connects to all KleanRite™ Vacuums

Modular design construction for easy transport and service.

90° Tilt back head for easy tool change.

Magnetic Based Tooling

Conquer 30 Planetary Grinder

Quick Disconnect (QD) Magnetic Tooling

Kut-Rite's new Quick Disconnect tool mounting design is redefining how diamond tools are mounted. The QD system incorporates two locating pins, for precise tool positioning and the use of powerful neodymium rare earth "super magnets" to hold the tools in place. The result of this combination produces a tool system that allows quick and precise placing of tools for smooth running, holding power that virtually eliminates tool kick out during operation and extremely fast removal/insertion time.

Models	HP	Power Source	Power Specs	Weight	Tool Speed	Grinding Head Pressure
Conquer 30	10	Electric	240v Dual Phase VFD	550lbs	200-1300RPM	400lbs
