

BDC-22

Mid Size Dust Collector

BDC-22

Mid Size Dust Collector

The Blastrac BDC-22 is equipped with a Longopac bagging system, which is easy to mount and handle. Thanks to this system, the operators have no more contact with the dust in their direct vicinity. The Blastrac BDC-22 dust collection system is equipped with a M-class star filter and it is highly versatile. Comes standard with a HEPA filter and Longopac. The BDC-22 is ideally suited for use with medium shot blasting, grinding and scarifying machines.
