

EZ-SAND Orbital Sander

Improved Design

- 1 Increased strength and durability of the U-joint and U-joint collar.
- 2 Rubber bumper added to reduce handle damage.
- 3 Replaced IEC connection with twist-lock.

OLD

NEW

- 4 Improved dust bag design prevents bag from dragging on the floor.

- 5 Permanent pad driver prevents motor shaft from exhibiting excessive wear. Improved design provides increased aggressiveness.

- Allows direct attachment to sandpaper and eliminates the need for foam pads.

OLD

NEW

- Hex-head screws make replacements easier.
- Custom wrench provided for easier driver replacement.
- Adjustment made to prevent driver bearing inner race from rotating on shaft.

- 6 Improved handle latches are stronger and interchangeable with old latches.

- 7 Reduced vibration and improved shaft and bearing life.

- 8 QR code directs users to additional information such as manuals and data sheets.

!NOTICE!

Always transport and store this machine with sandpaper on the drivers to prevent damage to the grip face.

Decal instructs users to transport and store sander with sandpaper on the drivers to prevent damage.
