- 10 Exclusive tilt-back wheel system protects pad drivers from damage.

## PRODUCT DESCRIPTION

The Epoch HD-20 is a 20" dual speed, multi-purpose 230V machine perfect for moving quickly through gym floors and other large jobs. Use low speed for intercoat abrasion, fine finishing and polishing, or stain application. Used on high speed with the HydraSand, the Epoch acts as a planetary sander, abrading and flattening floors. Removable weights allow for various levels of aggressiveness.

## RECOMMENDED PRODUCTS

AVAC dust containment systems are the perfect mix of power and portability. At 26 and 12 gallon capacities, both models are easy to transport and are available with optional H.E.P.A. filters.

Our water-based TimberGuard line of floor coatings, cleaners, and sealers offers superior protection for your hardwood floors.

The HydraSand 20 incorporates a Dual Diameter Abrasion (DDA) head that improves sanding performance while reducing amp draw - provides maximum sanding performance and longer runs between abrasive changes.
